30	70	22,29	70,0

RING MEASURING GUIDE

At Frank Zampa, we want to ensure that your online shopping experience is as easy as possible. We understand the importance of getting the right size. Our practical tips below will help you measure and determine your size according to the European ring size chart. If you're still left unsure, we will be more than happy to assist you either through our online chat option or in-store.

KEEP IN MIND THE BELOW TIPS:

Your ring should fit snugly on your finger without easily falling off. It should feel comfortable; not too tight and not too loose.

Check your size more than once and on different days – fingers tend to swell and change in size especially in cold/hot weather.

If your finger size falls between sizes, opt for the larger size.

Most rings can be re-sized; however, it is best to speak to us so we can discuss all options depending on the ring chosen.

MEASURE YOUR RING SIZE: THE ONLINE METHOD

The chart below will help you to determine your ring size. To make sure that the guide is scaled to 100%, you can use the provided line below and position your credit card on the line below. Adjust the image size until the card is set exactly between the 2 vertical lines.

Place your ring on the circles below until you find the one which is of the right size. You should only be able to see the inner solid colour with no white showing. Should your ring fall between two sizes, we always recommend to choose the larger size.

To determine your ring size, find the respective Diameter (mm) in our Ring Size Conversion Chart.

Diameter (mm)

RING MEASURING GUIDE

The ring size guide is set to be printed in A4 size and scaled to 100%. Please check your printer settings before printing for accurate measuring.

KEEP IN MIND THE BELOW TIPS :

Your ring should fit snugly on your finger without easily falling off. It should feel comfortable; not too tight and not too loose.

Check your size more than once and on different days – fingers tend to swell and change in size especially in cold/hot weather.

If your finger size falls between sizes, opt for the larger size.

Most rings can be re-sized; however, it is best to speak to us so we can discuss all options depending on the ring chosen.

MEASURE YOUR RING SIZE: THE PRINTED METHOD

- 1 Print the below measuring tape paper (about 152MM long and 6.5MM wide) or use a piece of non-stretchy string.
- 2 Wrap around the base of your ring finger. The fit needs to be snug but not tight.
- 3 Mark the point on the string/paper where it overlaps forming a circle.
- 4 Measure the length of the string/paper from the starting point to the mark.
- 5 To determine your ring size, follow our Ring Size Conversion Chart.

The above measuring instructions are for reference only. If you require further assistance, kindly contact us on info@frankzampa.com
